Thursday March 3, Doors 7:00pm, Show 7:20pm

\$7 Suggested donation

*Also featuring special audiovisual performances  
by Mark Cetilia (of Mem1) and Kamran Sadeghi*

*Cathedral Scan* translates the architectural plans of Gothic cathedrals into open-ended musical scores via custom software. Treating the plans as a map, in the live performance Carrington navigates through them to create diverse rhythms, drones and textures. Visually, the scanning suggests a metaphor between architecture and ghost-like palimpsest.

The full-length album is edited from a previous live concert in a large church, and combines the direct signal created in software with the immense natural reverberation of the performance space. Published by Dragon's Eye Recordings.
